YEAR-I EXAMINATION (2023)

FINAL/SUPPLEMENTARY THEORY EXAMINATION

Statistics and Research Methodology

Roll No.....

Paper code-02

Time: 3 Hours

Max. Marks:70

Before answering the questions, candidate should ensure that they have been supplied correct and complete question paper. No complaint in this regard, will be entertained after the examination.

Note: Section I contains 5 question each question carrying 2 marks. Section II contains 4 question each question carrying 15 marks.

Section - I

2X5 = 10

1. What is Type I and Type II errors.
2. Content analysis in psycho-social research.
3. What are Levels of measurement.
4. What is T-Test?
5. Application of statistics in clinical psychology?

Section-II

4X15 = 60

1. Distinguish between parametric and non-parametric tests. Explain with examples

or

A sample consists of the following $n=7$ scores: 5,0,4,5,1,2 and 4 •

Compute the mean and standard deviation for the sample. • Find the z-score for each score in the sample. • Comment on the application of mean, standard deviation and z score in test construction and research.

2. List any four tests of significance. Give a brief outline of the tests of significance that can be applied in epidemiological studies.

Or

Distinguish reliability assessments in terms of temporal stability and internal consistency. Give examples.

3. Define normal distribution. Also explain properties of normal distribution. How normal random variable can be transformed to standard normal.

or

What are the features of randomized block design. How is it different from factorial design.

4. What are non-parametric tests. What are the assumptions involved. Explain any three non-parametric tests with examples.

Or

Discuss various measures of dispersion with adequate examples

YEAR-I EXAMINATION (2023)

FINAL/SUPPLEMENTARY THEORY EXAMINATION

Psychiatry

Roll No.....

Paper code-03

Time: 3 Hours

Max. Marks:70

Before answering the questions, candidate should ensure that they have been supplied correct and complete question paper. No complaint in this regard, will be entertained after the examination.

Note: Section I contains 5 question each question carrying 2 marks. Section II contains 4 question each question carrying 15 marks.

Section – I

2X5 = 10

1. What is Interpersonal psychotherapy.
2. What is Alcohol related disorders.
3. Explain Attention deficit hyperactivity disorder
4. Write a note on Psychosurgery
5. Psychiatric service in community

Section-II

4X15 = 60

1. Classify intellectual disability (Mental retardation) based on IQ. Discuss the clinical presentations, assessment and management of intellectual disability. Briefly describe any one test used to assess intelligence in children.

Or

Describe the etiology, clinical features and management of depressive disorder. How to differentiate unipolar depression from bipolar depression.
